Objective

Results-driven Full Stack Developer with 3+ years of experience and a proven track record of delivering 30+ web applications and business solutions. Experienced in developing ERP systems, AI-powered platforms, cybersecurity applications, educational platforms, and e-commerce systems using Next.js, React.js, TypeScript, Node.js, and MongoDB. Strong expertise in REST APIs, authentication, RBAC, responsive design, performance optimization, and scalable application architecture. Committed to building secure, maintainable, and high-performing software solutions.

Experience

DNS Company for Development | Frontend Developer

Aug 2025 – Jan 2026

- Participated in developing an enterprise-level E-Commerce ERP System with complex business workflows and management modules.
- Developed reusable UI components and responsive dashboards using Next.js, TypeScript, and Tailwind CSS.
- Integrated APIs and implemented features related to inventory, products, orders, customers, and analytics.
- Improved application performance and user experience across different devices.
- Collaborated with developers and stakeholders to deliver high-quality solutions in an agile environment.

- Developed a complete corporate website with a large admin dashboard for managing content, services, products, projects, partners, and users.
- Built and maintained full-stack applications using Next.js, TypeScript, Node.js, MongoDB, and REST APIs.
- Developed MAHER, an AI-powered medical ERP and clinical assistant platform for healthcare professionals.
- Implemented modules for patient management, prescriptions, medical records, and clinical workflows.
- Integrated AI-powered features to support medical documentation and healthcare operations.
- Developed secure authentication, role-based access control, and responsive user interfaces.

Freelance Full Stack Developer

- Developed and deployed multiple full-stack web applications using Next.js, React.js, Node.js, and MongoDB.
- Built educational platforms including Elbash Mo3alem and STEM Foundation, featuring course management, authentication, dashboards, and content delivery.
- Developed Cyber Guard, a cybersecurity platform for security monitoring, vulnerability assessment, and reporting.
- Created professional portfolio and personal branding websites for clients across different fields, including baristas and network engineers.
- Built and customized several E-Commerce platforms with product management, orders, payments, and admin dashboards.
- Delivered responsive, SEO-friendly, and scalable web solutions for businesses and individual clients.

- **Backend:**
Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, Mongoose, Prisma
- **Tools:**
Git, GitHub, Postman, Cloudinary, Stripe, MongoDB Atlas, Dog API
- **Concepts:**
Responsive Design, SEO, Authentication, RBAC, API Integration, Agile Development

Certificates:

- Frontend Web Development in GDSC **Mar 2024 – Sep 2024** ➡
- C++ Track in GDSC **Mar 2024 – Sep 2024** ➡
- TypeScript Core Concepts in Mind Luster **Jan 2024 – Feb 2024** ➡
- 3rd Place — Industry Innovators Hackathon V2 **May 2026** ➡

Courses:

- Full stack web development (MERN) **(Mag Camp)**
- TypeScript Core Concepts (Mind Luster)
- Next Js Complete course (YouTube)

Achievements:

- 3rd Place – Industry Innovators Hackathon V2 (2026)
- Developed and deployed multiple production-ready web applications.
- Built enterprise ERP, cybersecurity, educational, and e-commerce platforms.

Projects:

❖ El-Bash Mo3alem– The Educational Platform ➡

- Developed a full-stack educational platform with **10+ management modules** for courses, books, live classes, payments, and student communication.
- Built secure authentication, real-time features, and responsive dashboards using **Next.js, MongoDB, and Tailwind CSS**.

❖ AS-portfolio (My Portfolio) ➡

- Designed and developed a responsive portfolio website showcasing 20+ projects and technical skills using Next.js, Tailwind CSS, and DaisyUI.
- Implemented dynamic themes, SEO optimization, and modern UI/UX practices.

❖ STEM - The Educational Platform ➡

- Built a full-stack educational platform featuring role-based access control, protected video streaming, course management, and analytics dashboards.
- Developed 15+ admin and student management features using Next.js, React, MongoDB, and Tailwind CSS.

❖ CyberGuard – Cybersecurity Monitoring Platform ➡

- Developed a cybersecurity platform with 11+ security scanning modules, including port scanning, SSL auditing, subdomain discovery, and breach monitoring.
- Built automated reporting, risk scoring, and real-time alert systems using Next.js, Node.js, and MongoDB.

❖ Ecommerce-Sil3ty ➡

- Developed a full-stack e-commerce platform with product management, order processing, Stripe payments, authentication, and admin dashboards.
- Implemented 20+ core e-commerce features using Next.js, Node.js, Express.js, MongoDB, and Stripe
